Lancaster Farming

OL 5 NO. 31 Lancaster Farming, Saturday, July 4, 1964 $2 Per Year

BARLEY HARVEST WAS JUST ABOUT CLEANED UP this week and at harvest was just around the corner. Some farmers in the eastern part of county have already cut wheat with the binder. Richard Peters, Manheim R4, ove runs the combine for his uncle, Benjamin Peters, in the barley field of Snenk, Manheim R2. The dry weather during the past two weeks made k work of barley harvest. L. F. Photo.

Dairy Demonstration Field Day Thurs. At Groff Farm

A crew of Extension Specialists from Penn State University are expected to assist the local County Extension Agents in conducting the Unit Demonstration Field Day, this Thursday, July 9

This all-day event is scheduled to be held at the farm of Mr. and Mrs J Wade Groff, 644 Beaver Valley Pike, Lancaster R7, Pa (located about one mile west of Lampeter)

From 10 a m until noon and from 2 30 p m until 4 p m., a series of guided Wagon Tours will be conducted over the farm; a number of special crop demonstrations have been established adapted to dairy farm production.

The specialists who will contribute to the day's program are: Fred A. Hughes—to discuss the importance of good farm management. Will be one of the afternoon speakers. John Baylor—from Extension Agronomy to discuss grass-legume forage mixtures and their uses Dexter Putnam—Extension Dairyman to review the dairy management practices on the Groff herd and the results Roger Grout—from Agi Engineering to conduct a barn remodeling demonstration on the Groff dairy barn Milford Heddleson—Soil Specialist to be in charge of the Soil Profile demonstration and discussion George Berggren—Extension Weed Specialist—to discuss the weed control program and will have a poisonous weed exhibit.

The formal speaking program will begin at 1 30 p m. on the lawn of the Groff home and lunch will be available at the farm.

All interested dairymen and grassland farmers are invited to attend this public, educational Field Day.

ckson Owen signs As Lanc. rming Editor

ck Owen, Editor of Lanr Farming since September 1956 has resigned to take sition as Information Spec- t of the staff of the ers of Maryland.

en a graduate of Quarle High School, earned Bachelor of Science de- in Agriculture Education re Pennsylvania State er in 1950 He taught at onal agriculture at ng ove, York County, wo ears before returning olor o High School where aug for seven years.

Mrs. Owen, the for- Ru Osborne, and their sor Eugene, fifteen, and t even, plan to move to Co ge Park, Maryland,

en successor will be d r he near future.

rm Calendar

6 — 9 a m — Landisville- ung 4H Sewing club ets at Hempfield Senior h School

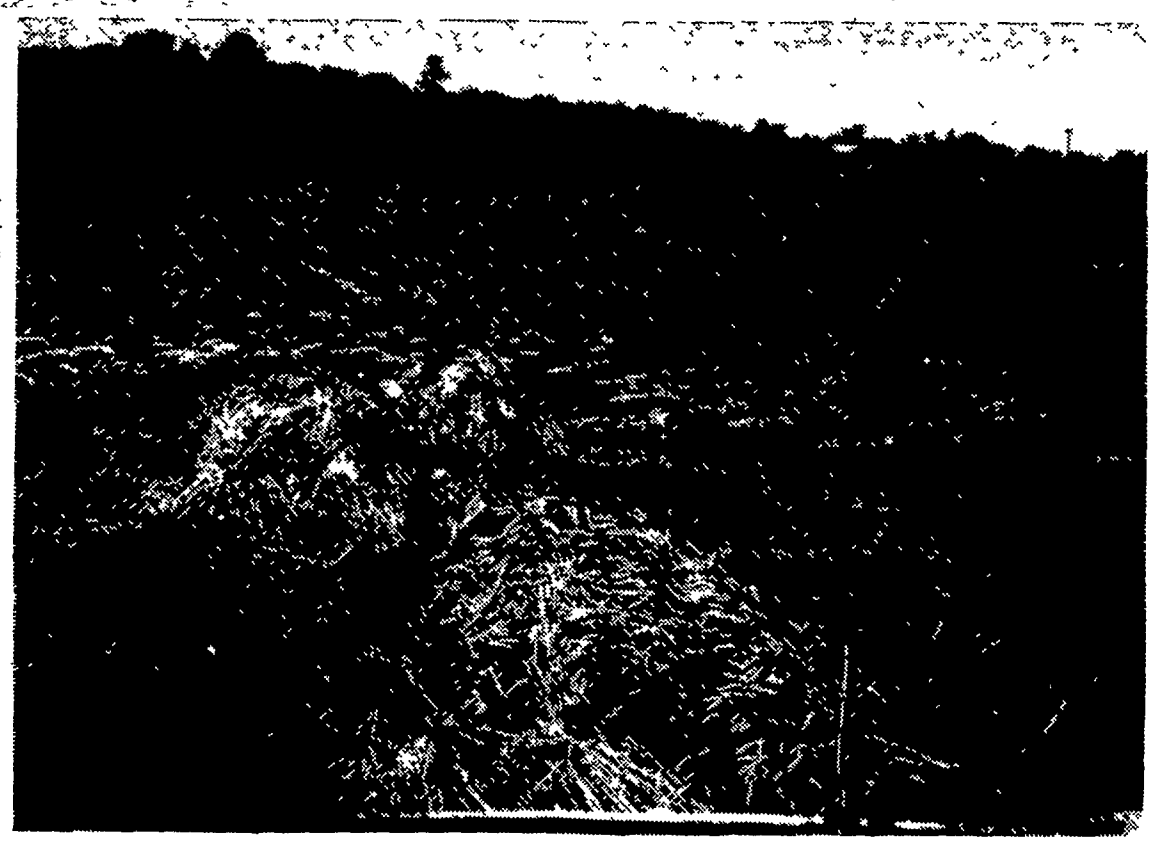
0 m — County 4-H mo ation Day at Penn no High School

7 — District 4-H Lead hip School at the Cocoa ney Pa

9 — 10 00 a m — Dairy ld at the farm of J de ff 644 Beaver Val- P Lancaster R7.

10 — 9 00 a m — 4-H cto driving contest at me le Equipment Co, me ville Pa

10 — Fruit Growers As- ar of Lancaster Coun- will tour Adams County.



WHEAT IS STILL SHOCKED IN SOME parts of Lancaster County. Some of our neighbors to the east of Lancaster still pull the binder through the grain fields with horses and shock the golden sheaves to complete the ripening process. To most of us it seems like a lot of hard work, but it continues to present an appealing view to tourists. L. F. Photo.

4-H Citizenship School July 12

A delegation of five Lancaster County 4-H members are scheduled to attend a week-long citizenship school at the National 4-H headquarters in Washington, D C, during the week of July 12 to 18.

The group from Lancaster County will be part of a 33 member delegation from seven southeastern Pennsylvania counties traveling by bus. They will be chaperoned by two extension agents. Mrs. Helen Tunison from Adams County and Paul Reber from Montgomery County

The Lancaster County members are Eric Stoner, 1051 Eden Road, Lancaster Lilli Ann Wivell, Columbia R1, Judy Longenecker Holtwood R1; Nancy Neff Millersville R1, and Charles Warfel, Conestoga R2

About four fifths of the cost of the trip will be paid out of the 4-H development fund set up last year to use the funds provided by the state from harness racing funds.

Pa. Farm Prices Up 1% Over May

Prices received by Commonwealth farmers in mid June increased one per cent from mid May according to the Pennsylvania Crop Reporting Service Hog prices advanced 6 per cent from last month but lower prices of other meat animals offset this increase.

Higher prices for poultry and eggs accounted for most of the increase in receipts from a month earlier Chicken prices increased 8 per cent, and egg prices 3 per cent. Egg prices were up a cent from May when they equalled the low May 1963 price

Field crops, both food and feed grains and hay show a substantial decline from last month Most important of these declines is wheat 7 per cent, barley 7 per cent, and hay 8 per cent

The wholesale milk price for June is estimated at $4 25 per cwt the same as last month and 13 cents higher than last year

The Index of Prices Received, which is a measure of the trend and changes of prices received by farmers, was 216

(Continued on Page 5)

Tomato Growers Specialty Shop Opened Wed.

The Washington Boro Tomato Growers Cooperative Assn. opened its staked tomato specialty shop for business Wednesday five days ahead of schedule

Manager Reeder M Young attributed the early staked tomato volume to substantial quantities of early spring rains which advanced ripening

(Continued on Page 5)

FIVE-DAY WEATHER FORECAST

Temperatures during the next five days are expected to average four degrees above the normal range of 65 at night to 87 in the afternoon. Quite warm over the weekend with a moderating trend thereafter. Precipitation may total ½ inch or more as scattered showers and thunder showers Monday and Tuesday.

Weekly Broiler Report

Eggs set in the State by tcheiymen for commercial oiler production during the ek ending June 27, totaled 302,000 according to the nnsylvania Crop reporting rvice This was an increase er the previous week by 22 r cent and 11 per cent over year ago The 3-week total s down 9 per cent from st year Chicks placed for mmercial broiler production opped 9 per cent from a ek earlier but climbed 16 r cent above a year ago. e 10 week was 3 per cent ove the comparable period t year. Inshipments of oiler-type chicks for the st 10-weeks totaled 876,000 92 per cent above last year. tshipments of 1,279,000 were wn 37 per cent.

Settings in the 22 States re- ned about the same as last ek but were 4 per cent ove a year ago The 3-week al was 2 per cent above a year earlier Placements also remained about the same as last week but increased 3 per cent over last year The 10-week total was down 1 per cent from a year earlier.

Eastern Pa. & N.J. Live Poultry

Prices on hens ranged higher as light supplies cleared well Demand was fair and offerings sometimes short of needs. Moderate purchases from outside areas noted Prices paid at farms for heavy type hens 13-15½c mostly 13-14c. light type hens 7-8c mostly 7-7½c.

NUTRIENTS IN MILK

Milk is our leading source of calcium. Unless we use milk every day, it's hard to get enough calcium in the diet, remind Penn State extension nutrition specialists Milk also provides high-quality protein, riboflavin, vitamin A, and other essential nutrients.

● **Delmarva**

Delmarva Prices Advance ¼ Cent

Live broiler prices in Delmarva advanced nearly ¼ cent during the 24 hour period ending Thursday morning

Moderate auction offerings met a good buying interest Demand for ready to cook irregular ranging from fair to good as buyers adjusted inventories carefully for the long Holiday weekend Sizes generally lighter than desired

Estimated slaughter for the weekend by eastern shore processors was 642,000 head compared to the 593,900 head last weekend.

Prices ranged 16 6 to 17 7 at farms on reported purchases of 535,200 head of the 552,000 head offered and sold at Wednesday's sale at the Eastern Shore Poultry Growers Exchange. Thirty-three percent of the auction sales were 16 6-16.9.

The Delmarva broiler-feed ratio for the week ending June 26 was up three points from the previous week at 3 5. Broilers averaged 17 25 per pound and mash cost the grower $99 - 69 per ton.

From Where We Stand . . .

Not Farewell — Just So Long!

There comes a time when all of us are called on to do something we'd rather not do

We have often wondered what this column would be like when the time came, and now that the time has come, we are still wondering

But for just this once, let's drop the editorial "We" and let me tell you that the past five years have given me some of the most enjoyable experiences of my life

Five years is a short time in the life of a man but that first issue back in 1959 seems like an eternity ago in experience

May I take this opportunity to thank you the reader, for your kindness, your encouragement and your helpful criticism Without you my job could not have been done

And may I take this opportunity to thank the teachers of vocational agriculture, the county agent's staff, the officers and directors of all the farm organizations, and all the FFA and 4-H reporters who cooperated so willingly in furnishing articles about their activities and meetings

It has been a real privilege to work with each of you, and I know that wherever I go or whatever I do, Lancaster County will always be home

And to the staff of Lancaster Farming may I say a special "thank you" for putting up with my bad moods, overlooking my mistakes and forgiving my shortcomings

Now before this piece gets too sickeningly sentimental, it is time to say — through these misty eyes:

At least that's how it looks from where I stand.

Jack Owen

Beefless Argentine

Reports coming into this country from around the world would seem to indicate that much of the earth's population needs beef.

Italy is in such short supply of beef that prices are nearly twice as high as here About the same can be said for France and England Now comes the report that the biggest beefeaters of all are suffering through beef-less days.

Argentina lays claim to the beef eating championship of the world averaging about a pound a day per person, but a recent law requires them to eat chicken lamb pork, fish or other meat on Mondays and Tuesdays until beef prices come down or production goes up

For half a century, beef raised on the Pampas has been Argentina's chief source of income Now the government is rationing it's citizens in an effort to maintain supplies for export.

With the oversupplies of domestic beef in this country, cattle raisers in the U S would like to have just a little bit of the problem facing Argentina

At least that's how it looks from where I stand

Should Know Better

The battle against food faddism and nutrition quackery is a long way from being won judging by a picture in a recent issue of a national magazine.

The picture shows Austronauts Virgil (Gus) Grissom and John Young fixing breakfast "by blending Tiger's Milk, a health food, with wheat germ, strawberries and eggs".

You can be sure the food faddists will begin beating their drums to the effect that Grissom, Young, and the well known magazine have endorsed their so-called health foods

The irony is that the United States Air Force and the President's Council on Physical Fitness have been using the Aerospace program as a dramatic example to encourage teenagers to be more aware of health and nutrition

It is as it should be that these two organizations point to the program as an example because it does comply with very sound principles of health and diet — principles which would be of benefit to the young people of the nation, whether or not they plan on becoming part of the space program

While we realize that the picture referred to above was not set up as a lesson in proper nutrition, the seed of an idea was planted. While eggs and strawberries may well be part of the aerospace program's recommended diet, Tiger's Milk and wheat germ hardly fit the pattern of sound dietary practices set up for the nation's austronauts and other servicemen.

To help offset the wrong impression that may have been created regarding the eating habits of space cadets, we would point out that servicemen consume three times as much meat as the average American, and normal rations are high in other nutritious foods.

It has been estimated that Americans spend nearly a billion dollars annually for dubious kinds of food supplements, concentrates, pills and frills said to do all and cure all for everybody.

There can be little doubt of the need for a continuing program of nutrition education at all levels of the American population when such highly-respected opinion leaders as the Austronauts are placed in the position of giving the food faddists a ready made platform from which to hawk their wares

The job can not be done cheaply or quickly, nor can it be done permanently, but it can be done It must be done, and it is up to us, the farmers, to do it.

At least that's how it looks from where we stand.

Beware Fake Cures — Former Postmaster General Day says: "The peddling of fake medical cures is the most prominent fraudulent activity conducted through the United States mails today. This huge 'industry' is so prevalent and so widespread that it taxes the manpower of the postal inspection service to the utmost in trying to bring the perpetrators to justice."

THE BIBLE SPEAKS

International Uniform Sunday School Lessons

BY DR. KENNETH J. FOREMAN

Ups and Downs

Lesson for July 5, 1964

Background Scripture: Genesis 46:1 through 47:12; Exodus 1.
Devotional Reading: Psalm 37:1-11.

WHAT HAPPENS to you isn't usually so important as what you learn from what happens to you. That is why, sometimes, a simple backwoodsman has a wiser philosophy of life than some men with a much wider experience.

Dr. Foreman

Wisdom is not confined to people who can afford to go anywhere and see anything. We shall follow this clue in the next three months while these lessons follow the history of an ancient people, ancestors of the modern Jews. We shall not try to do as the historian does, lay this out like a textbook in history. If we did that, we should hardly begin our first chapter by the time we reach the end of the column. For we should first have to answer the question: When did these things happen? Who was the Pharaoh of Egypt at that time? Nobody knows for certain. All we know is, it was a long time ago. You can look it up in dictionaries of the Bible if you like. But what we shall be doing is only to offer hints on what we can learn from the story; and you can read the story for yourself in the Bible. Maybe the story suggests other meanings to you. If so, we shan't quarrel about it!

Life's ups and downs

What is the most disturbing thing about life? As you go on growing older and older, one of the most distressing features of life is that it won't stay put. Just when it seems to be fixed to suit you, something happens that turns your life upside down and inside out.

Blessings in disguise

Those Hebrews, as they had begun to call themselves, went into Egypt as free men, welcomed and cared for by his Royal Highness the Pharaoh. In a few years (as history's years go) those happy Hebrews' descendants had become slaves, their lives made bitter by brutal slave-drivers, and living on the edge of starvation. They were in actual danger of extinction. No Egyptian would intermarry with them, and the Pharaoh made a determined effort to destroy all the boy babies. For how long a time the Hebrew people had been shut off, as they were, from all the outside world, we do not know. But we do know this was a blessing in disguise. Unable to live a free life, they developed in slavery a sense of kinship that was much stronger than it might have been if each clan had gone off to live by itself in Egypt or elsewhere. No doubt also their sense of their need of God was stronger, at least in some of them, than it might have been if they had suffered no misfortunes. The disorganized tribesmen who had come into Egypt so happily, now were less happy, but more closely knit.

Shade and shine

There's another thing: life's ups and downs aren't just that. When you are climbing a mountain you may be slipping a good deal too. Perhaps it would be better to speak of life's shade and shine. No shade is absolutely black; no brightness on this earth is as bright as brightness can possibly be—say on the sun; otherwise we should all go blind. So the experiences we call "bad" may have good concealed in them, and the experiences in life we call good may not be wholly good as we look back on them. If the Hebrews hadn't gone into Egypt, they might have starved; but they might not have become slaves either. When they became slaves, it's a safe guess that not one of them thought it was a good thing; yet as has been just suggested, some good came out of it. In fact, if they hadn't led such a wretched existence as slaves, who knows whether they would have been willing to leave Egypt at all? God sometimes makes things so uncomfortable for us that we are willing to make changes we would be too lazy to make without being prodded!

(Based on outlines copyrighted by the Council of the Churches of Christ in the U. S. A. Released by Community Press Service.)

Now Is The Time . . .

BY MAX SMITH

MAX SMITH

To Prevent Drowning

Farm Pond owners are urged to have some safety equipment handy during the swimming season Life-saving equipment such as rafts, inflated innertubes, rope planks, wooden ladders, and boards should be at the side of the pond in case of emergency Any one of these items may save a life Swimmers are reminded not to swim alone, and not go into the water when over-heated

To Plan For Extra Pasture

Many dairy and livestock producers are concerned about the slow growth of their regular pastures There is little that can be done to revive them without sufficient rainfall or irrigation The sowing of temporary pasture crops such as winter rye or winter wheat during late August or September will provide late grazing this fall and early grazing next spring These crops will stretch the pasture season and reduce the need for as much hay or silage

To Control Grazing

Herd owners that are soon turning out on sudan grass or one of the hybrid sorghums should limit the grazing area each day in order to utilize a greater amount of the forage If the herd is permitted to cover the entire area, it is quite possible they will tramp as much as they consume Following grazing, the stubble should be clipped 3 to 4 inches high in order to get quicker, more uniform new growth Delay grazing the sudan grass until it has reached 16 to 18 inches tall, and permit the sorghum hybrids to reach 24 to 30 inches before pasturing

Utilize Wheat as a Feed Gra

Under present conditions, might be advisable for many farmers to use some of the wheat as a livestock and poultry feed. Nearly all types of livestock can make use of limited amounts of ground cracked wheat Digestive trouble such as scouring or bloating may occur when too great amounts are used This will vary from 20 to 30% of the grain mixture; other grains and proteins should be used to make up the balance of the mixture.

SUPERMARKETS VARY IN ITEMS STOCKED

You won't find the widest variety of foods at supermarkets in the richest part of a city says the U S Department of Agriculture In a recent survey Department marketing specialists found the biggest stock of items in supermarkets in lower income neighborhoods The reason is that budget-conscious homemakers need the widest selection of foods to make their budgets stretch Supermarket managers are aware of this and see that they get what they need

(Continued from Page 1)

He said the wholesale and retail demand for the season's first picking is "excellent." Competition from adjacent states in good quality fruit has so far been short, Young said.

The Washington Boro crop, grown on the protected sandy hills along the Susquehanna River, is normally the first picked north of Maryland and commands an exceptionally high priced early market.

Young said prices on the co-operative sales floor Wednesday were $21 a bushel for No. 1 grade, $15 for No. 1 cracks and $12 for No. 2 grade fruit

4-H Sewing Club Sees Films

Forty-two members were present at the Landisville-Salunga 4-H sewing club meeting which was held on Monday, June 29.

Donna Yeager, the vice president, had charge of the meeting. She led the group in the 4-H club pledge, after which the secretary and treasurer's reports were given. Dues must be paid by next week. They are 10 cents a member for one year.

Debbie McFarland led the club in a song and then demonstrations in sewing were given by some of the members.

Alice Savage of the Lancaster County Home Economics office showed films on how to apply a waist band to a skirt and how to set in a sleeve.

The club continued working on their garments until the meeting was adjourned.

The next meeting will be held at the Hempfield Senior High School on July 6 from 9 a.m. to 11:30 a.m.

Jolly Stitchers Hear Report

The third meeting of the Jolly Stitchers 4-H club was held at the home of Mrs Clydeth Buch on June 22

There were twenty-three members present. June White presided at the meeting.

Sandra Snyder gave a report on the county council meeting.

The meeting adjourned after songs led by Sharon Roden.

After the meeting was adjourned, games were led by Ruth Gockley and Darlene Neidemyer.

At the work meeting the following junior leaders were present. Joyce Horst, June White, Sandra Snyder and Jane Smith.

FRUIT GROWERS TRIP THIS FRIDAY

The Lancaster County fruit growers tour to Adams County will be this Friday, July 10

The all-day bus trip was arranged by the Extension Service and the Lancaster Association of Fruit Growers executive committee

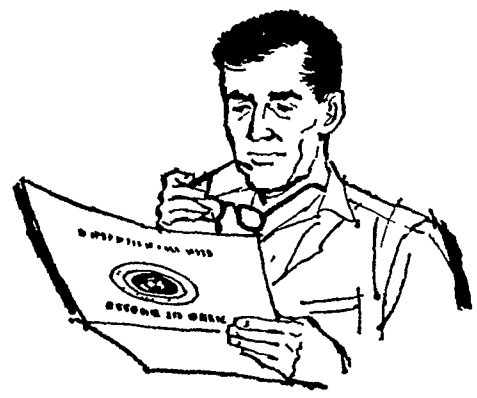
per cent of the 1910-14 equals 100 base This compares with 214 a month earlier and 212 a year ago.

Mr. Dairyman:

Are you managing your herd for profit?



Managing for profit must begin with your dry cows and bred heifers.

Management for profit calls for feeding the dry cow and bred heifer to accomplish three things;

Build the unborn calf

Build the cow's reserve

Stimulate the cow's milk-producing system so that she may produce to her in-bred ability

You can not expect last years top proformer to repeat only because she has the potential.

She has to be fed for high production — and particularly when she is dry.

No other period in a cow's life has as great an influence on milk production as does the two month period just before she freshens.

Management for profit must also begin with feeding your dry cows PIONEER DRY & FRESH.

On PIONEER DRY & FRESH and the PIONEER Program your dry cows get the nutrients they need, and you can be sure that she will produce according to her capability.

Stop in soon or ask our servicemen about the PIONEER management for profit program, beginning with your dry cows.

There is profit in PIONEER.

ORGANIC PLANT FOOD CO.
GROFFTOWN RD. Next to the Waterworks

If flies are about to drive your cattle crazy,

then you better see us fast for

ORTHO DIBROM 1% Fly Spray

If you're sick and tired of fooling around with weak, half-hearted fly sprays, then you're ready for DIBROM. Minutes after you spray, every fly that's been hit will be dead or dying When DIBROM hits 'em, they stay hit Even if they're resistant to other sprays.

DIBROM is registered to spray over and around cattle. In fact, Dibrom in emulsified form is even safe to spray on food crops, up to four days of harvest.

It's easy to use, comes to you ready-mixed and gives you real economy. Sure, it costs a little more than your pyrethrin sprays, but you'll find that it gives a lot better kill. So when all is said and done you wind up getting back a lot more of the money that flies have been costing you in reduced milk and meat production.

Come in and see us . . . we'll be glad to show you how to go after flies like you mean it . . . . . with ORTHO DIBROM.

Cooking In Quantity

By Mrs. Richard C. Spence

SPENCE

If you're chairman of the picnic committee or in charge of your club's covered dish social you might have use for some of the recipes we have today When cooking for 25-50 people it is best to use a recipe devised for that number. You can sometimes run into trouble when doubling or tripling a recipe.

For quantity food preparation, weighing of ingredients is generally recommended because it is speedier and more accurate than measuring However, in these recipes quantities for most of the ingredients are given in standard measures as well as in weights for the convenience of those who prefer measuring.

HAM LOAF
25 Portions

- 2 pounds ground smoked ham (raw)
- 12 ounces ground fresh pork (raw)
- 12 ounces ground beef (raw)
- 6 ounces (1½ cups) celery, chopped
- 1 ounce (2 tablespoons) fat or oil
- ⅔ cup (3) eggs
- 3 cups cooked tomatoes
- 1½ teaspoons salt
- ¼ teaspoon pepper
- ¾ teaspoon powdered dry mustard
- 6 ounces (1½ cups) breadcrumbs dry

Combine ham, fresh pork and beef Saute celery in fat or oil for 10 minutes and add to meat mixture Beat eggs and add to the meat mixture. Add tomatoes, seasonings and breadcrumbs Mix thoroughly Pack mixture into loaf pans (10 x 4 x 4 inches), about 3 pounds or 1¼ quarts per pan Bake at 400 degrees (hot) for 1¼ hours Double recipe for 50 portions

BAKED FRANKFURTERS AND RICE

- 2 pounds 4 ounces frankfurters cut in ½ inch slices
- 1½ quarts cooked tomatoes
- 5 ounces (1 cup) green pepper chopped
- 12 ounces (2 cups) onion, chopped
- 1 teaspoon garlic, minced
- 1 pound 2 ounces (4½ cups) cheese, grated
- 3 pounds cooked rice (2 quarts
- 2 teaspoons salt

Combine all ingredients Pour into greased baking pans (20½ by 12½ by 2½ inches), about 10 pounds 10 ounces or 1¼ gallons per pan. Cover and bake at 400 degrees (hot) for 50 minutes. Uncover and bake 15 minutes longer or until green pepper and onion are tender Makes 25 portions (¾ cup). For 50 portions, double recipe.

BARBECUED LIMA BEANS

- 1 pound 12 ounces (1 quart) dry lima beans, (small)
- 3 quarts boiling water
- 6 ounces (1 cup) onion, chopped
- 1¼ teaspoons garlic, minced
- 8 ounces salt pork, chopped
- 3 tablespoons prepared mustard
- ½ teaspoon salt
- 2 teaspoons Worcestershire sauce
- 2 teaspoons chili powder
- 2½ cups condensed tomato soup
- ¼ cup vinegar
- 1½ tablespoons brown sugar
- 2 cups bean liquid

Add beans to boiling water and boil for 2 minutes. Remove from heat cover and soak for 1 hour or overnight if more convenient Boil gently until tender Drain. Save the liquid Brown onion and garlic with the salt pork Combine all ingredients Place mixture in baking pans (16 x 10½ by 2½ inches) about 7 pounds 4 ounces or 3¼ quarts per pan Bake at 400 degrees (hot) for 30 minutes Makes 25 portions (½ cup) For 50 portions

tions, double recipe.

* * *

SCALLOPED POTATOES

4 ounces (½ cup) butter or margarine
2 ounces (½ cup) all-purpose flour, sifted
1 ounce (2 tablespoons) salt
2 quarts milk, hot
1½ ounces (¼ cup) onion, chopped (optional)
6 pounds 4 ounces potatoes, peeled and sliced thin

Melt fat, Blend in the flour and salt. Stir into hot milk and cook until thickened, stirring constantly. Add onion, if desired. Place potatoes in baking pans (20½ by 12½ by 2½ inches), one pan for 25 portions. Cover with sauce, 2 quarts per pan Cover pans and bake at 350 degrees (moderate) for ½ hour. Remove cover and bake about 1 hour longer or until potatoes are tender and top is brown. 25 portions (¾ cup). Double recipe for 50 portions.

CHICKEN SALAD

2 pounds 8 ounces (2 quarts) cooked chicken, diced
10 ounces (2 cups) sweet pickle, chopped
9 ounces (2¼ cups) celery, diced
2 ounces (⅓ cup) onion, chopped
14 ounces (2⅓ cups) cooked rice
⅓ cup sweet pickle liquid
8 ounces (1 cup) mayonnaise
2 teaspoons salt
2 tablespoons lemon juice
¼ teaspoon prepared mustard

Combine all ingredients and mix well Chill before serving Portion with a No 8 scoop (½ cup) and serve on crisp salad greens. 25 portions (½ cup).

COOKED SALAD DRESSING

8 ounces (1 cup) sugar
2½ tablespoons all purpose flour
1 tablespoon salt
1 tablespoon powdered dry mustard
⅛ teaspoon cayenne
1 ounce salad oil (2 tablespoons)
1¼ cups (6) eggs
3 cups milk
1½ cups vinegar

Mix sugar, flour and seasonings Stir in oil. Beat eggs and stir in gradually. Slowly blend in the milk, then the vinegar. Cook mixture over hot water until it thickens, stirring occasionally. Makes 1½ quarts.

Ladies, Have You Heard? . . .

By: Doris Thomas, Extension Home Economist

THOMAS

Fluffing Of Carpet Or Rug Is Normal

Your carpet or rug is not falling apart when you notice it fluffing This is normal for new carpets and rugs Fluffing takes place when a rug sheds lint that has been left in the fabric.

Carpet yarn is made of various lengths of fibers When pile loops are cut, some short ends are left in the fabric So during the first few months you have your rug or carpet, it sheds this lint as it works to the surface But, this isn't a carpet defect and it won't affect the wear or appearance of the carpet.

Safety Reminders For The Home

Stairs are not designed for storage . . . keep steps free from all items all the time. If you have basement stairs without a guard rail, spend a few dollars and a few hour's work building a guard rail It will be the best investment in safety you can make.

When carrying loads of articles up or down stairs, keep the loads small and carry them to the side so you can see each step

Take time to wipe up spills on the kitchen floor

Avoid scatter rugs they may turn into flying rugs and if this happens then decorative value can be offset by medical costs in case of an accident

A good step ladder is a worthwhile investment A chair or box is a poor substitute and can be a costly one

Worth Knowing

Potatoes cooked in their jackets are richest in vitamin and mineral content But, if you must pare them, keep the parings thin and cook the potatoes as soon as possible after

Crop Summary

Harvesting In Full Swing

Harvesting and tobacco transplanting continued in full swing this week in the county.

Soil moisture became increasingly short in many areas of the state during the week ending June 29, according to the Pennsylvania Crop Reporting Service Irrigation was being used more generally to offset a lack of adequate rainfall.

Row crops were cultivated and sprayed for weed control.

Combining of barley proceeded rapidly in the southern counties Wheat has headed well and is turning yellow. Much oats headed on short straw Corn stands are very spotty and ranges from 10 inches to waist high The dry weather and cool nights have slowed corn growth Some corn is being planted for silage

Hay and pasture conditions vary widely even within localities Reports range from no grazing possible to good pasture within the same county Hay making is progressing rapidly throughout the state Hay quality and yield are generally good Alfalfa weevil is causing some damage in the central counties Some second crop alfalfa hay is being made

Sweet cherry harvest is in full swing Yields are especially good in the important Lake Erie fruit belt A few areas are having some trouble with bird damage and rot Some sour cherries are being picked Thinning and spraying of apples in the southern and central areas continues Early varieties of peaches are showing color

Potatoes are in good condition and show good growth. Early stands in Lehigh county are in bloom.

Some snap beans are being planted in the north, while in the central areas they are beginning to bloom. In the south harvesting should start in early July. Beets, sweet corn, cucumbers and tomatoes are growing well. Some beet harvest is taking place. Early sweet corn areas have good stands with some plants in tassel. In later areas the stands are more irregular. Lettuce and cabbage are growing well in the southern areas with harvest starting.

Pest Control Chemicals To Be Controlled

UNIVERSITY PARK, Pa , — Plans for the effective control of pesticide residues on farm commodities were initiated jointly today by the Pennsylvania State University College of Agriculture and the State Department of Agriculture

Leland H Bull, State Secretary of Agriculture, and Dr Russell E Larson, dean of the College of Agriculture, said primary concerns are for quality control in farm products and assurance to consumers that they are getting wholesome commodities

They said emphasis will be placed on research, and that laboratory facilities of the department and those of the college will be pooled for making necessary analyses This joint approach, they pointed out, will speed up the work and avoid duplication of effort

Both indicated they will be working closely with farmers throughout the state to study problems of insect and disease control as an aid to the producer and to assure consumers of getting clean and wholesome products

Pesticide recommendations, they explained, are made in accordance with federal laws and regulations which stipulate the various tolerances These recommendations are uniform for all states

Dean Larson and Secretary Bull said Pennsylvania farmers have a good record for the safe use of pesticides and that every effort is being made for safeguarding users of pesticides and feed additives and

● Have You Heard?

(Continued from Page 7)

paring. Cook in as little water as possible and use the cooking liquid in soups and gravies.

It's wise to start cooking potatoes in boiling water. And when the water has reached boiling, reduce the heat to just bubbling—never violently boil a potato. Boiling cooks the outside before the inside, and by the time the inside is tender the outside is overcooked. The smaller the pieces, the quicker they cook. So if you are in a hurry, cut potatoes into halves, quarters or cubes . . . but do not increase the cooking temperature.

Cold cuts are an economical meat buy. Every ounce is edible, and a pound makes at least four servings. Cold cuts compare favorably in nutritive value with fresh meats—they provide the same kind of high-quality, body-building protein that is in all meats. The easiest way to add important nutrients to your daily menu is to form the habit of serving a glass of milk with every meal.

Buy or sell with a classified ad!

ANIMALS NEED SHADE

Farm animals like available shade from the hot sun, too says Thomas King, extension animal science specialist at The Pennsylvania State University If no natural shade is available in the pastures, you can set four poles in the ground use a framework of light poles for the roof and cover with straw or corn stover held in place by woven wire.

Pequea 4-H Hears Visitors

Members of the Pequea Valley 4-H club heard a 4-H club member from Colorado tell of her experiences in 4-H at a Monday evening club meeting in the Intercourse fire hall

Miss Judy Hildred, Larimer title are Judy Perella and County, Colo., was part of a delegation of 38 Colorado youth visiting in the county this week.

Miss Cynthia Brackbill was elected candidate for county 4-H queen and Evelyn Groff is alternate Candidate and alternate for the junior queen title are Judy Perella and Carol Eby, respectively.

Vice president Carol Eby chaired the meeting in the ab-

Pest Control Short Course Set At PSU

Training in pest control work is available in a new two year winter course offered by the College of Agriculture at The Pennsylvania State University The two year technical course was developed with the advice and financial support of the Pennsylvania and the National Pest Control Associations

Fred E Snyder, director of agricultural short courses at Penn State, says the training will prepare men and women for employment in the production, formulation, sale, and use of pesticides and in control work related to insects and other pests He describes the training as the only two year winter course of its type in the United States

The first year's instruction begins October 14 with the first term ending December 12 and the second term beginning January 13 and ending March 13 A six months on-the-job training runs from April through September The second year's program starts in October.

Dr. Snyder says there is room for 17 more persons to enroll for classes starting in October Laboratory facilities will accommodate 28 trainees

Persons interested in enrolling should request an application form from Short Course Director Room 211 Armsby Building, University Park, Pa 16802 Details will be furnished regarding housing, food service tuition fees, and other costs

Instruction at the University Park campus will stress entomology pesticide technology, control of pests, types and uses of spray equipment — and basic chemistry, botany zoology and microbiology

This training, Dr Snyder says will be supplemented with courses on soils and fertilizers, weed control plant pathology, and turf management Courses in written and spoken communication, business records, salesmanship, and personnel management prepare students for responsible positions Dr Snyder adds

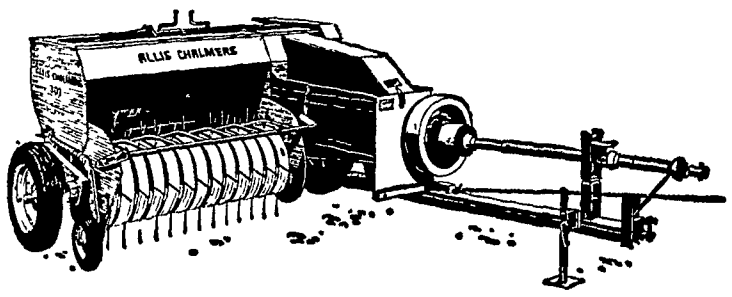
TWIN RAKE FEEDING
WITH
"ELBOW FORK" ACTION



MAKES THE BEST BALES YET
303 BALE-CHIEF
Twin Rakes on the new Allis-Chalmers 303 Bale-Chief make bales solid, square—tied tight. The kind an ejector can throw. Bales resist buckling because "Elbow Fork" action takes out windrow wads that can make other bales pop their twine. Takes heavy windrows into the chamber in clean, sweeping action. Forks retract completely up and out of hay each back stroke. No drag or auger-churning to shred leaves. Big capacity. Come see this new 303 Bale-Chief now.

ALL NEW!

GEHL Chop-All Mower Bar

mows off tall or short; chops fine

No crop too tall. None too short — for the new Gehl Chop-All Mower Bar. With one-two precision you mow forage clean; then chop *fine* for better packing in silos.

Retracting fingers on the powered feed roller keep the crop "on the move" from auger to chopper throat. Eliminates crop bunching and slow-downs Three power-driven compression rollers then flatten the crop . . . hold it tight. The payoff: Six chrome-edged knives and long-lasting tungsten-carbide cutter bar turn out famous Gehl *fine* chopping.

Gehl's new Select-A-Cut transmission lets you vary forage length—short, medium or long—with the push of a lever. New Easy-Swing drawbar adjusts right from the tractor seat. A rigid tripod (optional) holds the forage deflector more firmly in place.

GEHL More than a century of service

Make us Prove it with a Demonstration!

Christmas Tree Plantings Down

A sharp reduction in commercial Christmas tree plantings this year was reported today by the Pennsylvania Crop Reporting Service.

Based on the results of a May 1 survey new plantings were 26 per cent less than in 1963 and only 59 per cent of the five year (1959 63) average

A total of 4,417,000 trees were planted this year as compared to 5 934 000 planted in 1963 and the five-year average of 7 483,000

Scotch pine plantings totaled 2,119,000, an 18 per cent decline from 1963 Other pines planted amounted to 253,000 trees—47 per cent less than 1963 Fir plantings totaled 845 000 trees—down 33 per cent from last year Spruce plantings totaled 1,200,000—down 26 per cent

This is the sixth consecutive year for reduced plantings of Scotch pine and other pines

Survival rates of young trees planted in 1962 and 1963 were considerably lower than normal Due to prolonged droughts during the summer months of 1962 and 1963, together with heavy snowfall and extremely cold winters, young plants entered dormancy in a weakened condition

Breeders Sign 161 Sheep To State Sale

HARRISBURG — Forty-three breeders from nine states, including 30 from Pennsylvania have consigned 161 sheep of seven major breeds for the 16th Stud Ram and Bred Ewe Show and Sale July 11 in the State Farm Show Building Harrisburg.

Milton K Morgan sale manager, said the list will include 8 rams 15 ewes 34 yearling rams 47 yearling ewes, 23 ram lambs and 34 ewe lambs Breeds represented are Cheviot, Corriedale Dorset, Hampshire, Shropshire Southdown and Suffolk

Open to breeders in all states the show, at 8 a m and sale starting at 1 p m, are sponsored by the Pennsylvania Sheep and Wool Growers Association Walter Newton, Jr New Albany president, and Stan Gates Lafayette Hill, secretary

The only Lancaster County consigner was Mrs Milton K Morgan New Holland Pike

Other states in the show and sale are Virginia, West Virginia Maryland Delaware, New Jersey, Vermont, Ohio and Iowa

4-H Members To Demonstrate

The Penn Manor Clashing Thimbles met on July 1 at the Penn Manor Junior High School for a combined work and business meeting

Connie Stehman and Linda Porter will enter a demonstration on nutrition at Demonstration Day July 6 at the Penn Manor High School

Their next meeting will be held July 15 at 9 a m at the Penn Manor Junior High School

Attend Church on Sunday

EFFICIENCY

MUST YOU BE BIGGER TO BE MORE EFFICIENT?

Not necessarily so. Efficient means to produce more of a quality product with less time, money and labor per unit. EFFICIENCY is measured by comparing Production with costs — more of a product — at less costs. Breeders, Nutritionists and allied industry all help,
But,
The best bird
on the Best Feed
in the Best House
will not be efficient if poorly managed. The moral:
Prevent Waste,
Money Waste,
Feed Waste,
Labor Waste,
Mortality Waste, and
Thinking Waste.

FEED WASTE!

Feed is your greatest cost. Do not allow feed to be wasted by careless . . . Help,
Birds,
Feeders poorly adjusted or too full,
The rats,
Sparrows,
Insects,
Molds.
Feed makes a poor litter.

MONEY WASTE!

Decide what you need, then shop carefully.
Three questions:
1. What will this expenditure do to cut production costs and increase output. What do you do with labor and time saved?
2. How good is the product and will it hold up.
3. What about price; is it a good buy?

LABOR WASTE!

Five steps saved a day equal one mile per year. In large families this may not be a problem. If you have hired help, look at work output per dollar spent for labor.
Will a machine do better? Can you look after a machine better than a hired man?
Would a change in farm help do the job better?
Time has value to the producer. Consider time into cost.

MORTALITY WASTE!

A poor disease prevention program is expensive. Do you get to the lab in time to prevent losing some $2.00 pullets? Do not over-medicate — get a good diagnosis first.
Successful producers tie decisions to cost. It does not pay to spend $14.00 for drugs if it will bring you $7.00 by increased production. Over-investment in birds, feed, equipment or anything else is money lost.
In decisions making, the first step —
A List of true costs
next
Consider net returns.

THINKING WASTE!

Good managers think for themselves. Others cannot make all of your decisions. You may not know how to formulate a complete ration or produce a genetically superior bird. BUT, you can keep track of how different birds do on different rations under different housing and market conditions. You can analyze published records. Get the complete story, not just half of it.
Good managers seek information as if it were money because decisions made from this information may
Cost Money
or
Return Profits
depending on whether the decision was good or bad.
